**RE: Engine Performance Testing at Powhaton and Lochbuie Compressor Stations
AST Project No. 2019-0489D/0490D**

Alliance Source Testing, LLC is pleased to submit the attached source test plans on behalf of Rocky Mountain Midstream LLC for Engine Performance Testing at Powhaton and Lochbuie Compressor Stations located in Adams and Weld County, Colorado. Testing is proposed for April 9-12, 2019.

Powhaton Compressor Station – 2 Engines - April 9, 2019

CDPHE Construction Permit 17AD0780 and 40 CFR Part 60, Subpart JJJJ requires testing for the facility. Testing will be conducted to determine the emission rates of NO_x, CO, VOC and HCHO from two (2) Caterpillar 3606 natural gas fired engines (C-210 & C-211 / AIRS 007 & 008).

Lochbuie Compressor Station – 4 Engines – April 10-12, 2019

CDPHE Construction Permit 17WE1195 and 40 CFR Part 60, Subpart JJJJ requires testing for the facility. Testing will be conducted to determine the emission rates of NO_x, CO and VOC from three (3) Caterpillar 3606 engines (C-210, C-211, C-212/ AIRS 001, 002, 003) and one (1) Caterpillar 3516 engine (C-213 / AIRS 004).

Feel free to call or email with any comments or questions regarding these test plans.
